

TARIQ BIN ZIYAD

AI ENGINEER | PYTHON BACKEND DEVELOPER

Rawalpindi, Pakistan | 0348-8267779 | tariqziyad025@gmail.com

Portfolio: tariqbinziyad09.github.io

PROFESSIONAL SUMMARY

Computer Science graduate and AI/Python developer with hands-on experience building and deploying full-stack AI applications, REST APIs, CRM workflows, semantic search systems, and data-driven backend services. Built a production Solar AI Sales Agent & CRM using React, FastAPI, PostgreSQL, Groq AI, SQLAlchemy, JWT/RBAC, and a knowledge-graph search platform using Django, FastAPI, Neo4j, ChromaDB, and Sentence-Transformers. Seeking junior AI Engineer, Python Developer, or Backend Developer opportunities.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML, CSS

Backend & APIs: FastAPI, Django, REST APIs, SQLAlchemy, CRUD applications, authentication

AI / LLM & Search: Groq AI, LLM integration, embeddings, semantic search, Sentence-Transformers, ChromaDB

Databases: PostgreSQL, Neon, Neo4j, Microsoft SQL Server, relational modeling, graph modeling

Security & CRM: JWT authentication, RBAC, lead pipelines, proposals, tasks, follow-ups, activity timelines

Frontend & Deployment: React, Vite, Render, GitHub Pages

SELECTED PROJECTS

Solar AI Sales Agent & CRM | Production Full-Stack AI Project | React, FastAPI, PostgreSQL, Groq AI, SQLAlchemy, JWT/RBAC

- Built and deployed an AI-powered solar sales platform combining customer conversations with CRM workflows, lead management, solar sizing, and product/package recommendations.
- Implemented persistent AI chat, appliance-based system sizing, lead qualification, proposal generation, PDF quotations, and recommendation guardrails.
- Developed Kanban lead pipeline, notes/activity timeline, tasks, follow-ups, reminders, staff management, lead assignment, and dashboard analytics.
- Implemented JWT authentication and role-based access for Admin, Sales Manager, and Sales Executive.

Noor ul Ilm - Knowledge Graph and Semantic Search | Final Year Project | Python, Django, FastAPI, Neo4j, ChromaDB

- Built a search application across Quran, Hadith, and Bible content with Python API services and source-linked references.
- Used Sentence-Transformers and ChromaDB for semantic retrieval, supporting concept, synonym, and theme searches.
- Modeled concepts and relationships in Neo4j for interactive graph exploration and connected relational, graph, and vector data.

Library Management System | Python, Django, SQL, HTML, CSS, JavaScript

- Implemented book issue/return, member management, fine tracking, authentication, role-based access, and CRUD workflows.

EXPERIENCE

Freelance Graphic Designer | Fiverr | 2024-Present

- Work directly with clients to clarify requirements, revise designs from feedback, and deliver final assets on agreed timelines.

EDUCATION

Bachelor of Science in Computer Science | 2022-2026

Pir Mehr Ali Shah Arid Agriculture University, Rawalpindi
